RELAZIONE SUPPLEMENTARE

ADDITIONAL REPORT

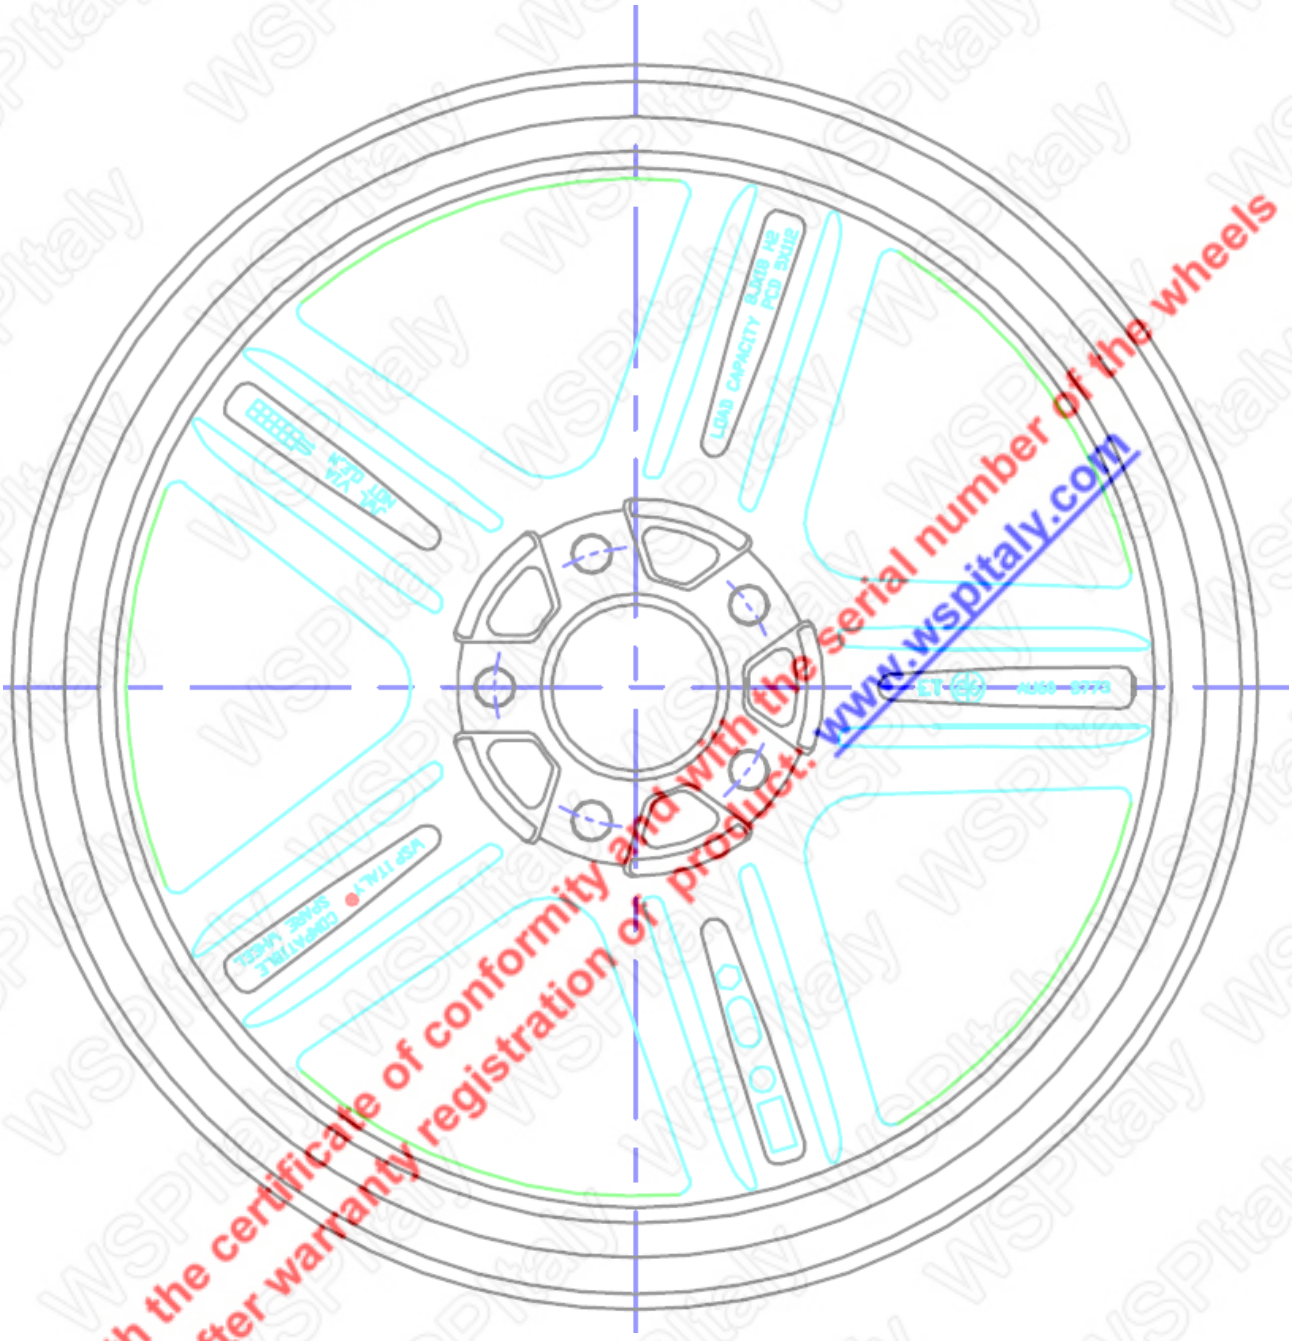

Requisiti supplementari di cui all'allegato 10 punti 2.1, 2.2, 2.3 e 2.4 del regolamento ECE/ONU n° 124

Additional requirements referred to attachment 10 points 2.1, 2.2, 2.3 and 2.4 of Regulation No. 124 UN/ECE

2.1 Controllo dell'ingombro della ruota

Il controllo dell'ingombro è relativo al profilo di ingombro interno degli organi di sospensione, sterzatura e frenatura dei veicoli su cui il cerchio deve essere installato. Tuttavia tale controllo non è necessario che venga esperito nel caso in cui il profilo della ruota oggetto dell'omologazione sia esterno a quello della ruota sostitutiva del costruttore. Ove mai tale condizione non si verificasse sarebbe invece necessario procedere a verifica delle tolleranze tra profilo ruota e profili di ingombro interno, ovvero verificare che:

1) luce minima per i componenti dei freni (caso peggiore, ad esempio con nuove guarnizioni per freni): > 3 mm;
2) luce minima per i componenti della sospensione (ad esempio, bracci superiori e inferiori della sospensione): > 4 mm;

Informations for retailers and end users

The WiSP Italy wheels are compatible replacement parts homologated in accordance with Regulation UNECE R124, the wheels replicate designs and models of car manufacturers and are identical to OEM wheels in appearance, shape and dimensions.

-A) The WiSP Italy wheels can be used solely to substitute, for repair scope, one or more wheels incorporated in the car complex product and to restore the original appearance of the vehicle when placed on the market, in observance of art. 110 Reg. CE n. 6/2002 as well as in conformity with the judgement issued by ECJ on 20th Dec 2017 in the joined cases C-397/16 and C-435/16. The match of WiSP Italy wheels with OEM wheel Part Number facilitates the wheel-vehicle association in observance of current law provisions. It is thus not allowed any use of WiSP Italy wheels for purposes not compliant with the above written scopes.

Warranty

Warranty validity is ensured if the conditions of point A) are respected. Serial codes for activation of the warranty are both on the box of products WiSP Italy and on the certificate of conformity. They are also valid for traceability and authenticity of our product, type approved and safe. The buyer is obliged to register the serial codes within 15 days (fifteen) from purchase date, purchase invoice will attest the date.

Transport

All the wheels sold by WiSP ITALY, with reference to codes, models, design, finish and accessories must be checked upon their receipt. In case of claims about damages due to transportation, please inform immediately the courier. In case of claims about any other defects, you have to forward your claim to WiSP ITALY within 24 hours from the receipt of goods.

Assembly

The wheels must be mounted according to all the indications stated in the Technical Cards. **(1)** Before mounting the tyre on the wheel, you must follow the listed instructions very carefully:

-The wheel must be suitable for the vehicle (special fitment)

- No part of the vehicle (clamp, brakes, shocks-absorber etc.) must be in touch with the wheel. Such problems could occur only in case of non-compliance with point (A) **in this case warranty is voided and manufacturer is exempted from any liability with immediate effect.**

- All the accessories (bolts, nuts) shall comply with the original equipment used by the vehicle manufacturer

- For mounting problems and / or discrepancies on the adaptability arising from any use or application not corresponding to the information provided by WiSP Italy and/or not described in the attached manual, **the validity of the guarantee and the right to reimbursement and acceptance of any complaints is declined with immediate effect**.

Maintenance

It is recommended to keep clean the surface of the wheel and prevent it from coming into contact with substances that may alter it, particularly salty deposits. Do not use high-pressure jets to clean, nor acids neither abrasive/corrosive means that may damage or scratch the chromium plated surface such as powders or metallic blades. It is recommended to use only water and neutral soap with a soft cloth for delicate surfaces. It is recommended to avoid during car-washing the use of some detergents used to wash the engine and the underbody.

The WiSP ITALY alloy wheels, a product of high technology, are manufactured with extreme care and precision.
